PARTICIPANTS NEEDED

ECCaToN
EMBRACING
COMPLEXITY

FOR RESEARCH INTO NEURODIVERSITY

We are looking for **volunteers** to help us gain a better understanding of **typical and atypical development** and how this may manifest in different individuals.

We aim to **improve** individual wellbeing in the long run through increasing people's access to the **support** they need!

Do you have any difficulties related to **cognitive function** (e.g., attention, learning and/or memory)?

Have you been **referred** to assessment or **support services** for any difficulties?

Are you able to provide informed **consent** on your **own** behalf?

Are you aged between **16** and **50**?

If you have answered **YES** to the above questions, please e-mail **Karin Madericova** at **170096872@aston.ac.uk** to register your interest!

Please scan the above QR code to visit the **ECCaToN website for more information on the project**
